

Conducting Forensic Investigations on Network Infrastructure (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 09

Student: Samuel Guardado

Email: sguar5@brockport.edu

Report Generated: Thursday, July 30, 2026 at 6:30 PM

Time on Task: 1 hour, 54 minutes

Progress: 100%

Section 1: Hands-On Demonstration

Part 1: Perform Packet Capture and Analysis

11. Make a screen capture showing the timestamp-sorted traffic.

13. Make a screen capture showing the IP-filtered traffic.

15. Make a screen capture showing the port-filtered traffic.

17. Make a screen capture showing the TCP push flag-filtered traffic.

19. Make a screen capture showing the http-filtered traffic.

Part 2: Analyze a Router for Forensic Evidence

5. Make a screen capture showing the router's version output.

15. Make a screen capture showing the currently running configuration.

Section 2: Applied Learning

Part 1: Perform Advanced Packet Capture and Analysis

7. Make a screen capture showing the successful transfer of the secureTopo.png file.

15. Make a screen capture showing the passive port specified by the FTP server in the Packet Details pane.

18. Make a screen capture showing the Time to live field in the Packet Details pane.

20. Make a screen capture showing the Follow TCP stream window.

32. Make a screen capture showing the reconstituted PNG file.

Part 2: Identify Suspicious Outgoing Connections

Record the destination IP address and Port number of the outgoing connection attempt.

The destination IP address was 202.20.3.10 and the port was 1337
