

## Digital Forensics, Investigation, and Response, Fourth Edition - Lab 04

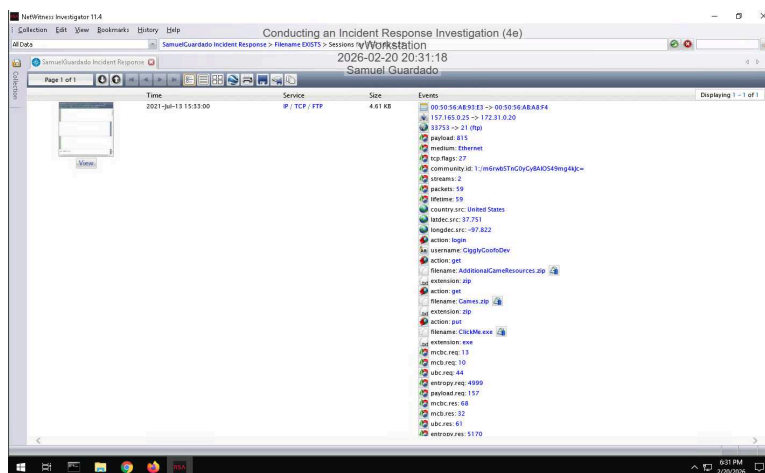

Report Generated: Thursday, July 30, 2026 at 6:28 PM

## Part 1: Analyze a PCAP File for Forensic Evidence

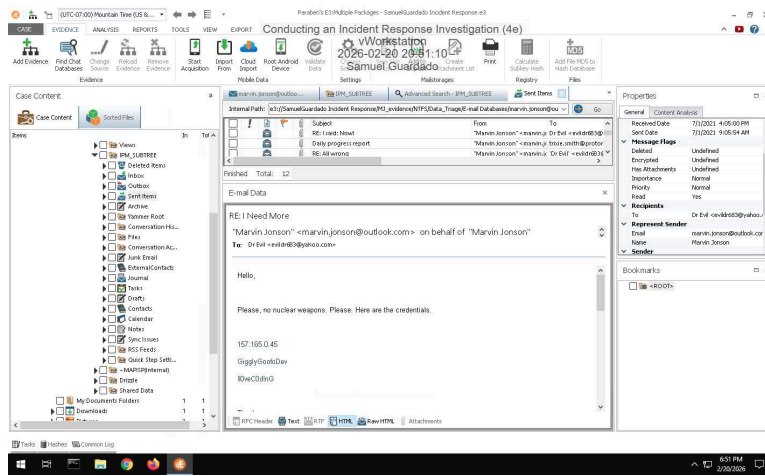

**10. Make a screen capture** showing the **Time Graph**.

16. **Make a screen capture** showing the **details of the 2021-Jul-13 15:33:00 session**.

18. **Make a screen capture** showing the **email containing FTP credentials** and the **associated timestamps**.

## Part 3: Prepare an Incident Response Report

### Date

Insert current date here.

February 20, 2026

### Name

Insert your name here.

Samuel Guardado

### Incident Priority

Define this incident as High, Medium, Low, or Other.

Stolen/Compromised Credentials are very high risk. Since the attacker does not need to exploit vulnerabilities since he already has access to the system. They are also harder to detect, since the account is a legit user. Stolen credentials, might even be critical, depending on the privileges and domain of the user that is compromised.

### Incident Type

Include all that apply: Compromised System, Compromised User Credentials, Network Attack (e.g., DoS), Malware (e.g. virus, worm, trojan), Reconnaissance (e.g. scanning, sniffing), Lost Equipment/Theft, Physical Break-in, Social Engineering, Law Enforcement Request, Policy Violation, Unknown/Other.

The attack lead to Compromised User Credentials(Marvin Jonson's'). Although, it could open doors to Network Attacks (e.g., DoS), Malware (e.g. virus, worm, trojan), Reconnaissance (e.g. scanning, sniffing), Social Engineering, and Policy Violations.

### Incident Timeline

Define the following: Date and time when the incident was discovered, Date and time when the incident was reported, and Date and time when the incident occurred, as well as any other relevant timeline details.

-The actual attack took place on July 13, 2021 between 3:31 PM and 3:33 PM.-Date/Time of Discovery: July 31, 2021 at 10:30 Am Eastern Time. -Date/Time of Report: July 31, 2021 at 10:40 Am Eastern Time.

### Incident Scope

Define the following: Estimated quantity of systems affected, estimated quantity of users affected, third parties involved or affected, as well as any other relevant scoping information.

After this incident, the systems affected would be the FTP server, the estimated quantity of users affected is unknown. Although, we are positive that Kevin Jonson's accounts is compromised. The third parties involved would be the attacker, Dr. Evil.

### Systems Affected by the Incident

Define the following: Attack sources (e.g., IP address, port), attack destinations (e.g., IP address, port), IP addresses of the affected systems, primary functions of the affected systems (e.g., web server, domain controller).

The Attack source came from 157.165.0.25, and attack the IP address of 172.31.0.20. He attacked the FTP servers, which are used for securely transporting, managing, and transferring files within a network.

### Users Affected by the Incident

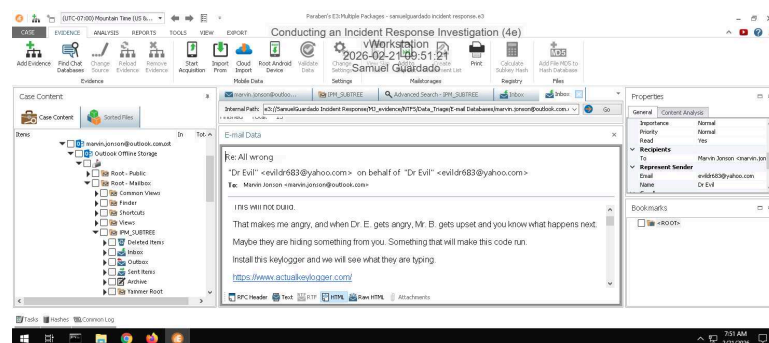

Define the following: Names and job titles of the affected users.

The Users affected in this incident were Marvin Jonson, a Project Manager at Giggly Goofo.

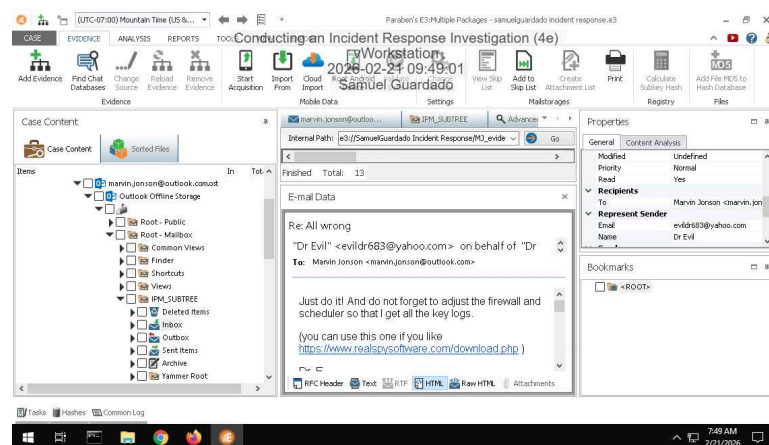

## Section 2: Applied Learning

### Part 1: Identify Additional Email Evidence

10. Make a screen capture showing the email from Dr. Evil demanding Marvin install a keylogger.

11. Make a screen capture showing the email from Dr. Evil reminding Marvin to update the firewall and scheduler.

### Part 2: Identify Evidence of Spyware

Author: Marvin Jonson. Date Values: 2021-06-30T14:16:23.2705256

Port: UnknownLocation: C:\ProgramData\SecurityMonitor\{AKC34567-KCQR-WW34-AK47-INUM589023MY}\akl.exe.Name: ActualKeylogger

The screenshot displays the 'Incident Response Investigation (4e)' workspace. The top navigation bar includes tabs for CASE, EVIDENCE, ANALYSIS, REPORTS, and TOOLS. The main workspace is divided into several panes:

- Left Pane:** Contains icons for 'Add Evidence', 'Find Out Databases', 'Change Source', 'Related Evidence', 'Remove Evidence', 'Start Acquisition', 'Import From', 'Cloud Import', and 'Mobile Data'.
- Top Center:** Displays the date and time '2026-02-24 10:27:12' and the name 'Samuel Guardado'.
- Top Right:** Includes icons for 'View Slip List', 'Add to Slip List', 'Create Attachment List', 'Print', 'Calculate Subkey Hash', and 'Add File MD5 to Hash Database'.
- Registry View (Right Pane):** Shows a tree structure with the following items:
  - Device\HarddiskVolume2\ProgramData\Security Monitor\{AKC34567-KCQR-WW34-AK47-INUM589023NY}\ak.exe
  - Device\HarddiskVolume2\ProgramData\Security Monitor\{AKC34567-KCQR-WW34-AK47-INUM589023NY}\ak.exe
  - Microsoft\Windows\Sec\{FATHA\_gw5n1h2yey}
  - Device\HarddiskVolume2\Windows\System32\WinL.exe
  - Device\HarddiskVolume2\Windows\regedit.exe
- Bottom Left:** Shows a 'Finished' status and a 'Common Log' button.
- Bottom Right:** Includes a 'Bookmarks' section with a single bookmark labeled '<Root>'.

**Start Time:** GMT: Wednesday, June 30, 2021 9:36:42 PM. Your time zone: Wednesday, June 30, 2021 5:36:42 PM GMT-04:00 DST.

17. **Record** whether Marvin interacted with or simply opened the keylogger.

The ActivityType tab display both, a 5 and a 6. This means that Marvin not only opened the app, but interacted with it.

## Part 3: Update an Incident Response Report

Insert current date here.

02/21/2026

Insert your name here.

Samuel Guardado

### **Incident Priority**

Has the incident priority changed? If so, define the new priority. Otherwise, state that it is unchanged.

The incident priority is still high, but a keylogger was discovered.

### **Incident Type**

Has the incident type changed? If so, define any new incident type categories that apply. Otherwise, state that it is unchanged.

The incident type has changed. Other than stolen credentials, and a compromised FTP server, we have an active key logger in Marvin's account.

### **Incident Timeline**

Has the incident timeline changed? If so, define any new events or revisions in the timeline. Otherwise, state that it is unchanged.

It seems the employee had been interacting with a keylogger trying to gather information from the company computer weeks before the real incident timeline.

### **Incident Scope**

Has the incident scope changed? If so, define any new scoping information. Otherwise, state that it is unchanged.

The scope of the investigation has broadened. The new facts of the case can lead us to determine why the employee was threatened into helping Dr. Evil hack into the company's computer.

### **Systems Affected by the Incident**

Has the list of systems affected changed? If so, define any new systems or new information. Otherwise, state that it is unchanged.

The list of affected systems is unchanged.

### **Users Affected by the Incident**

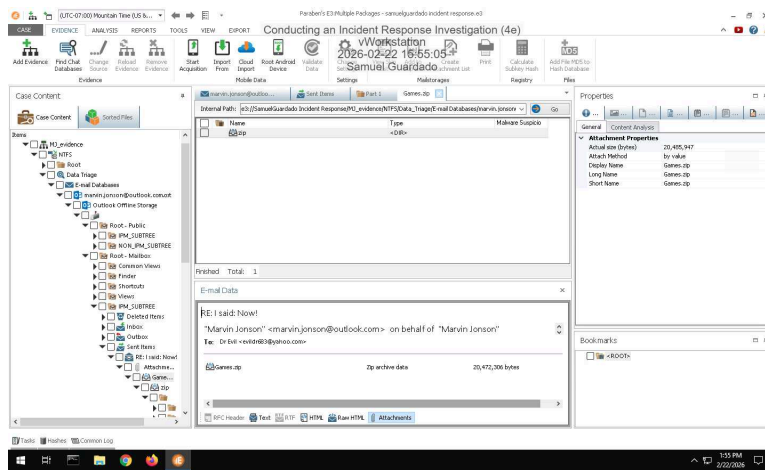

Has the list of users affected changed? If so, define any new users or new information. Otherwise, state that it is unchanged.

The list of users affected is unchanged.

## **Section 3: Challenge and Analysis**

### **Part 1: Identify Additional Evidence of Data Exfiltration**

**Make a screen capture** showing an **exfiltrated file in Marvin's Outlook database**.

## Part 2: Identify Additional Evidence of Spyware

Make a screen capture showing the email with instructions for installing additional spyware.
